

Four different types of charts

Question

The bar chart below shows the numbers of men and women attending various evening courses at an adult education centre in the year 2009. The pie chart gives information about the ages of these course participants.

introduction

The bar chart below shows the numbers of men and women attending various evening courses at an adult education centre in the year 2009. The pie chart gives information about the ages of these course participants.

The bar chart compares the numbers of males and females who took four different evening classes in 2009, and the pie chart shows the age profile of these attendees.

The bar chart compares the numbers of males and females who took four different evening classes in 2009, and the pie chart shows the age profile of these **attendees**.

Overview

one sentence for each chart

It is clear that **significantly** more women than men attended evening classes at the education centre. We can also see that evening courses were much more popular **among** older adults

Details 1

According to the bar chart, drama, painting and language courses all attracted more women than men to the education centre in 2009. Language classes had the highest number of participants overall, with 40 female and 20 male students, while painting was a popular choice among both genders, **attracting** 30 female and 25 male attendees. The only course with a higher number of males was **sculpture**, but this course was taken by a mere 15 people in total.

Details 2

Looking at the age profile pie chart, we can see that **the majority** of people attending evening lessons **were over 40 years of age. To be precise**, 42% of them were aged **50 or more**, and 26% were ages **between 40 and 49**. Younger adults were in **the minority**, with only 11% of students **aged 20 to 29**, and only 5% **aged under 20**.
